Office Action Summary	Application No. 10/538,257	Applicant(s) NARAYANAN, RAJU	
	Examiner J. Casimer Jacyna	Art Unit 3754	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character “24” has been used to designate both a passage and a mandrel scope on line 2 of paragraph 17. Also, the drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they do not include the following reference sign(s) mentioned in the description: demarcation 27 used on line 8 of paragraph 16 is not in the drawings. Also, passage 24 mentioned on line 2 of paragraph 17 is not in the drawings. Likewise, passage 23 as stated on line 3 of paragraph 16 is not in figure 2. The element identified as 23 in figure 6 does not appear to be a passage as described in paragraph 16. Finally, the drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: Element 23 in figure 6 is not identified in the specification.
2. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
3. The disclosure is objected to because of the following informalities: On line 14 of paragraph 13, “11can” is a typographical error. On line 17 of paragraph 13, tube and

Art Unit: 3754

manufacture are two separate words. Applicant has not provided a specific definition for the word “anticounterfeiting” and this is not a word that appears in standard English dictionaries. It appears that this term should be hyphenated since counterfeiting is a word. Also, the counterfeiting portion of “anticounterfeiting” is misspelled at least on line 9 of paragraph 16, line 9 of paragraph 13.

Appropriate correction is required.

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 13-24 rejected under 35 U.S.C. 102(b) as being anticipated by Monroe 3,356,263. As noted in the PCT search report, Monroe discloses a flexible tube 10, a shoulder 11, a closeable outlet 12, and a portion 27 of plasticized and squeeze formed material 27 that is a different color as disclosed on column 3, line 10-26. In regard to the method claims, the claims do not define any specific method for pressing or squeezing the material portion wherein the pressure head of height of the material in manifold 16 as shown in figure 7 of Monroe will generically press or squeeze material 27 into the cavity 25 against the mandrel 21 as claimed.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Takahara et al. teaches another flexible tube with an anticounterfeiting stripe 16 having a different color.
